

Environmental Policy Statement

Matsuura Machinery Ltd (MML), based in Coalville Leicestershire, is recognised as a market leader in the field of unmanned multi-pallet and multi-tasking CNC machine tools, 3D additive printers, and their associated manufacturing process solutions.

MML fully accepts its responsibility to protect the environment and this is achieved through our Environmental Management System that meets the requirements of ISO 14001:2015 and also ensures our business processes are carefully monitored, measured and controlled to promote continual improvement of our environmental performance.

The company is also committed to compliance with all relevant environmental legal and other requirements.

In addition to the above commitments other key priorities for reducing and mitigating our environmental impacts are:

- The prevention of pollution, particularly emissions to the atmosphere, which may lead to the detrimental effects of global warming and ozone layer depletion.
- The promotion of energy efficiency initiatives that reduce greenhouse gas emissions and preserve natural resources.
- The minimisation of waste to landfill through the adoption of the waste hierarchy: ELIMINATE, REDUCE, REUSE and RECYCLE.
- The raising of environmental awareness with staff, clients, suppliers and other stakeholders involved in our business activities through training and consultation.
- The implementation and maintenance of emergency response plans to mitigate the effects of any accidental environmental incident.
- Establish controls as appropriate, in the design and development process to address each stage of the product life cycle. This includes making customers aware of their responsibilities when selling or disposing of the machine. All waste must be correctly handled in line with current legislation and manuals must be provided to new users for awareness of safety standards and correct installation and operation

This policy is reviewed periodically at our management review meetings to incorporate any changes to our environmental impact created by new or revised business activities. It is the basis for our annual environmental objectives that are communicated to all staff to promote both their involvement and commitment to the improvement of our business.

The policy is also available to all interested parties including the public.
